ELFTE BANDETS INNEHÅLL

		Sid.
1.	VON EULER, H., HASSELQUIST, H., und WÅHLSTAM, H., Zur Kenntnis der Endiamine	1– 4
2.	HASSELQUIST, H., Über die Entstehung von aci-Reduktonen bei der Spaltung der 4-Aryl-2,3-diketo-butyrolaktons. II	5– 7
3.	VINK, H., Copper complexes in alkaline ethylenediamine solutions. A spectrophotometric study	9– 21
4.	FREDGA, A., Studies on synthetic growth substances. IX. The configuration of N-arylamino-propionic acids with growth-regulating activity	23– 28
5.	VINK, H., Studies on cupriethylenediamine solutions of cellulose	29– 39
6.	USDIN, E. and PORATH, J., Separation of folic acid and derivatives by electrophoresis and anion exchange chromatography	41– 46
7.	MYRBÄCK, K., Inhibition of yeast invertase (saccharase) by metal ions. III. Inhibition by Ag^+ and the complex formation between Ag^+ and imidazole derivatives	47– 55
8.	LINDGREN, P.-H., Some experiments concerning the effect of temperature on the crystallinity (orientation) in elongated neoprene specimens	57– 76
9.	HALVARSON, K. and MELANDER, L., Orientation and hydrogen isotope effect in nitration of anisole	77– 88
10.	SEMENZA, G., Chromatography of deoxyribonucleic acid on calcium phosphate	89– 96
11.	PORATH, J., Some cellulose ion exchangers of low substitution and their chromatographic application	97–106
12.	ESPING, U., A factor inhibiting fertilization of sea urchin eggs from extracts of the alga *Fucus vesiculosus*. I. The preparation of the factor inhibiting fertilization	107–115
13.	ESPING, U., A factor inhibiting fertilization of sea urchin eggs from extracts of the alga *Fucus vesiculosus*. II. The effect of the factor inhibiting fertilization on some enzymes	117–127
14.	SJÖQUIST, J., Determination of amino acids as phenyl thiohydantoin derivatives. I. Micro synthesis of 3-phenyl-2-thiohydantoins from amino acids	129–135
15.	LINDSTEDT, S. and TRYDING, N., On the metabolism of bishomocholic, homocholic and norcholic acids in the rat. Bile acids and steroids. 50	137–144
16.	LINDSTEDT, S., The formation of deoxycholic acid from cholic acid in man. Bile acids and steroids. 52	145–150
17.	SJÖQUIST, J., Determination of amino acids as phenyl thiohydantoin derivatives. II. Chromatographic separation of 3-phenyl-2-thiohydantoins of amino acids	151–160
18.	PORATH, J., Temperature distribution within cylindrical electrophoresis columns of large capacity, stabilized by capillary systems. Construction of a flexible apparatus suitable for fractionations on a ten gram scale	161–184

19. Gustavson, K. H., Approximation of the proportion of uni- and multipoint binding of basic chromium chlorides by collagen 185–194
20. Widmark, G., Investigation of derivatives of Δ^3-carene 195–203
21. Holm, B. and Widmark, G., Studies of carane, pinane and *p*-menthane . 205–210
22. Widmark, G., Autoxidation of (+)-limonene 211–218
23. von Euler, H. und Hasselquist, H., Zur Kinetik der Reduktone und Pseudo-Reduktone I 219–225
24. Widmark, G. and Holm, B., Investigation of carvone and related ketones 227–238
25. Jordan, J. and Ben-Yair, M. P., Enthalpy titrations involving citrate and tartrate chelates 239–249
26. Wåhlstam, H., 3,4-Dihydroxy-pyrrol-dicarbonsäure-(2,5)-dimethylester. Darstellung und Eigenschaften 251–254
27. Dohlman, C.-H., A method of assaying small amounts of S^{35} in tissues . . 255–257
28. Porath, J., Application of zone electrophoresis and cellulose ion exchange chromatography to the fractionation of posterior pituitary hormones . . 259–274
29. Myrbäck, K. and Willstaedt, E., Inhibition of yeast invertase (saccharase) by metal ions. IV. Inhibition by Ag^+ and the complexing of Ag^+ by certain sulphur-containing compounds 275–283
30. Claeson, G., 6-Benzylmercaptomethyl-3(2H)-pyridazinone 285–289
31. Tryding, N. and Westöö, G., Synthesis and metabolism of 2,2,17,17-tetramethylstearic acid. I 291–305
32. Tryding, N., Intestinal absorption and metabolism of 2,2-dimethylstearic acid in man 307–312
33. Tryding, N. and Westöö, G., On the metabolism of 2,2-dimethylnonadecanoic acid in man 313–316
34. Lawesson, S.-O., Thiophene chemistry. Part II. A new method of preparing 2,4-dibromothiophene and its Grignard and lithium reagents. Two-stage mechanism in the metalation of 2,4-dibromothiophene with butyllithium 317–324
35. Lawesson, S.-O., Thiophene chemistry. Part III. On the preparation of 3,4-dibromothiophene and its Grignard and lithium reagents. Two-stage metalation of 3,4-dibromothiophene. Substitution reactions of 3,4-dibromothiophene. Substitution reactions of 4-bromo-3-thiophenecarboxylic acid 325–336
36. Lawesson, S.-O., Thiophene chemistry. Part IV. The preparation of bromosubstituted thiophene Grignard reagents by "entrainment" and transmetalation. An indication of the validity of the Urion exchange mechanism 337–343
37. Lawesson, S.-O., Thiophene Chemistry. Part. V. Dehalogenation of bromosubstituted thiophenecarboxylic acids with butyllithium. An indication of a nucleophilic mechanism in the bromine-lithium interconversion 345–348
38. Oelsner, G. and Forsling, W., Rapid radiochemical separations of polonium isotopes from wolfram targets bombarded by cyclotron-accelerated neon ions 349–360
39. Gronowitz, S., Resolution and configuration of 3-thienylsuccinic acid . . 361–371
40. Lawesson, S.-O., Thiophene Chemistry. Part VI. Bromination of thiophene and bromothiophenes 373–386
41. Lawesson, S.-O., Thiophene Chemistry. Part VII. Bromosubstituted thiopheneboronic acids and their diethanolamine esters. The directing effect of the $-B(OH)_2$ group in electrophilic substitution 387–395

42. Melander, L., Molecular orbital calculations on the influence of a –I–M substituent on the reactivity of thiophene 397–405
43. von Euler, H. und Hasselquist, H., Zur Kinetik der Reduktone und Pseudo-Reduktone. II 407–417
44. von Euler, H. und Hasselquist, H., Chemische und biologische Versuche mit Pseudo-Reduktonen und Derivaten derselben 419–422
45. Gustavson, K. H., The uni- and multi-point binding of cationic sulphato-chromium complexes by collagen 423–430
46. Westman, L., Optical resolution and configuration of *a*-phenylglutaric acid 431–437
47. Sjöberg, B., Stereochemical studies. II. The enantiomers of α-(3-thianaphthenyl)-propionic acid 439–450
48. Kiessling, K.-H., Turnover rate of phosphate in mitochondrial thiamine diphosphate 451–454
49. Palmcrantz, P. J., L- and D-Leucyl-glycine-splitting dipeptidases in *Elodea densa* 455–461
50. Palmcrantz, P. J., On the nitrogen metabolism in *Elodea densa* 463–468
51. Kiessling, K.-H., The effect of the metabolization of different substrates upon the incorporation of P^{32} into mitochondrial thiamine diphosphate 469–470
52. Myrbäck, K., Inhibition of yeast invertase (saccharase) by metal ions. V. Inhibition by mercury compounds 471–479
53. von Euler, H. und Hasselquist, H., Reduktonate und Pseudo-Reduktone. Ihr Verhalten gegen Oxydationsmittel 481–485
54. Laurent, T. C., A comparative study of physico-chemical properties of hyaluronic acid prepared according to different methods and from different tissues 487–496
55. Laurent, T. C., A study of cetylpyridinium hyaluronate in methanol solution 497–501
56. Laurent, T. C., On the hydration of macromolecules. X-ray diffraction studies on aqueous solutions of hyaluronic acid 503–512
57. Laurent, T. C., The amorphous X-ray diffractogram of hyaluronic acid . 513–518
58. Gronowitz, S., On the thiophene analogues of mandelic acid 519–526
59. Brändström, A., On the reactivity of ions and ion-pairs in the Dieckmann condensation 527–533
60. Claesson, S. and Lindqvist, L., A flash photolysis apparatus for photochemical studies at very high light intensities and energies 535–559
61. Claesson, S. and Wettermark, G., The spectral distribution of oxygen-filled photolysis flash lamps as determined by chemical actinometry . . 561–565
62. Brändström, A., On the reactivity of ions and ion-pairs in some base-catalysed reactions 567–590
